PROFESSIONAL SUMMARY

B.Sc. Data Science student (CGPA 8+) at SIES College, Mumbai, with hands-on experience in Python, SQL, and data visualisation. Skilled at translating raw datasets into clear, actionable business insights through exploratory data analysis, dashboard design, and statistical analysis. Backed by industry-recognised certifications in Python, Pandas, and Data Visualisation, along with a Deloitte Data Analytics Job Simulation. Actively seeking a Data Analyst internship to apply these skills to real-world business problems.

SKILLS SUMMARY

- **Languages:** Python, SQL, R, SAS
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Plotly
- **BI & Tools:** Tableau, Power BI, Excel, Google Colab, Git, GitHub, Jupyter Notebook
- **Concepts:** EDA, Data Cleaning, Data Visualisation, Dashboard Design, Statistical Analysis, Business Intelligence
- **Databases:** MySQL, SQLite, DBMS Fundamentals

EDUCATION

SIES College of Arts, Science & Commerce *Mumbai, India*
B.Sc. in Data Science, Mumbai University; CGPA: 8+ overall (Sem 4: 8.59) Expected: 2027

HSC: 73.17% · SSC: 78.60%

Coursework: *Statistics & Probability, Linear Algebra, DBMS, ML Fundamentals, Data Structures*

PORTFOLIO & PROJECTS

E-Commerce Customer Behaviour Dashboard: Built an interactive dashboard analysing customer purchase patterns using RFM (Recency, Frequency, Monetary) segmentation to uncover actionable retention and marketing insights.
Tech: *Python, SQL, Pandas, Plotly, Tableau, RFM Analysis*

HR Analytics – Employee Attrition Analysis: Analysed employee data to identify key drivers of attrition and built visual dashboards to support HR retention strategy.
Tech: *Python, SQL, Pandas, Seaborn, Tableau, Power BI*

Superstore Sales Analysis: Performed end-to-end sales data analysis to surface trends in revenue, profit, and regional performance.
Tech: *Python, Pandas, Matplotlib, Seaborn, Google Colab*

COVID-19 Global Data Tracker: Tracked and visualised global COVID-19 case, death, and recovery trends across countries and time.
Tech: *Python, Pandas, Matplotlib, Seaborn, NumPy*

Netflix Content Analysis: Explored Netflix's content library to uncover trends in genre, release patterns, and content ratings.
Tech: *Python, Pandas, Matplotlib, Seaborn, SQL*

Smart Data Cleaner & ML Pipeline: Built a privacy-first, 100% client-side web app that automates EDA, data cleaning, feature selection, and ML model benchmarking, with CSV and PDF export.
Tech: *JavaScript (ES6+), HTML5, CSS3, PapaParse, Chart.js, jsPDF*

Tally Financial Data Sync: Built a Python pipeline that extracts P&L and Balance Sheet data from TallyPrime via its HTTP/XML API, stores it in MySQL by period, and validates it against live Tally data.
Tech: *Python, MySQL, TallyPrime HTTP/XML API*

Ride Sharing & Cab Booking Analytics: Built a Power BI dashboard analysing demand, revenue, and cancellations.
Tech: *Power BI, Power Query, DAX*
